Innovation - Persis

Brings wood and glass closer than ever before.

A world innovation adds an extravagant effect to the solid wood range: opaque relief glass fronts that resemble shimmering wood.

Navis

Delivers a powerful statement in terms of sophistication and style.

Providing a generous impact and elegant shapes, **Navis** opens a new class of contemporary interior design. Soft glass curves, which seamlessly flow into elegant lacquer, natural wood and powerful metal, give each unit the charisma of a striking individual piece.

Mega-Design

Outstanding design versatility.

One of **Mega-Design**'s strengths is its flexibility. Innovative functionalities, new options and attractive finishes allow individual combinations, giving this living room a shelving and library system an unmistakable look.

Multi-Forma II

Whether living room, hallway, home office or bedroom: each architecture has its own character. **Multi-Forma II** is ideally suited for individual situations and even unusual layouts.

Wardrobes and shelving with different units can virtually fit anywhere in a room – into small recesses as well as into huge rooms, with sloping ceilings or as a ceiling-high storage solution. It is even possible to build around doors.

Upon request, we find solutions for entire walls with recesses, whilst your designer wardrobe can also be used as a beautiful room divider. High, deep, wide – individuality and special requests are more than welcome. Your dream furniture leaves nothing to be desired.

Multi-Forma II can also be a walk-in wardrobe, flush integrated recess system or room divider due to its wide choice of dimensions and functionalities, the fact that it is easy to plan, and the possibility to find individual room solutions. Even as a “mini boutique”, the system effortlessly adapts to the existing interior design.

We manufacture tailor-made wardrobes.
