Stunningly Bright & Carefree

Granada in White

A statement piece. White in all its glory – as the universal colour for fronts and worktop. The floor-to-ceiling cabinets offer a huge amount of space and are a great partner for the back wall in wood colours with black shelves and wall units.

A kitchen with well thought-out details and stylish storage space.

Lively & Powerful

Laser Soft & Bali

Experience simple elegance at the highest level. In this kitchen, clearly defined areas in rich colours meet modern technology and fuse confidently together.

The result – a comfortable room in which living and working in one area are perfectly compatible and the kitchen quickly becomes the focus of the house.

Minimalistic & Bold

Perfect Soft in Black

Showtime for black.

This Kitchen is elegant and of high quality with an expressive play of light and shadow in its design. The grand dame in your interior- understated and spectacular at the same time.

Colour Selection

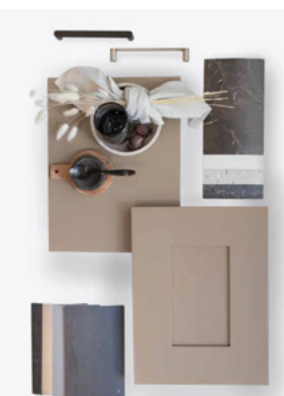

The new colours burgundy, eucalyptus, ocean and natural umber bring lively accents to modern kitchens.

All shades are coordinated so that they are ideal partners for all natural and wood shades, for white as well as for black and graphite. The selection colours are real all-rounders and highly popular in kitchens.

Ocean

Ocean, the symbol of reliability, sovereignty and strength. Dark blue shades radiate confidence and maturity. Probably the most popular colour of all - a real all-rounder.

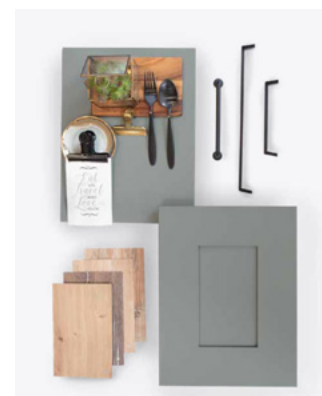

Natural UMBER

Naturalness in its purest form. The earthy base shade natural umber provides a down-to-earth sensation, calmness and security. A great shade that gives wood and black a radiance all of their own.

Burgundy

Has a sumptuous effect on the eyes and soul. This shade radiates comfort, warmth and elegance. Burgundy also has a royal air, is representative and symbolises luxury and power.

Eucalyptus

A colour that combines growth, nature, freshness and hope. Eucalyptus is like the harmonious middle, standing for calm and serenity. Green shades represent relaxation and bonhomie.

Versatile & Multifunctional

Twin in Natural Okobo, Sand, Oxide Mattone & Dark Stone

Twin represents the new era of laminate: the wood-effect decorations evoke pleasant exotic grain in regular shape, while the solid colour is extremely opaque, very intense and deep.

The material used are ecological, recyclable and CARB II certified, the high Californian standard for Formaldehyde emissions.

Twin is customization, endless choices, extraordinary mix & match of colours, shapes and finishes.

Chic Everyday

AL32 in Cotone & Rovere Cenere

A real gem that combines all the refinements of a modern kitchen. Intelligent technology, design and sustainability. A subtle colour combination is balm for our eyes. Like the successful combination of white glass with wood.

With this kitchen, you're opting for chic everyday practicality that specifically underlines your love of life. The interplay of colours and materials creates a lively elegance without appearing austere.

Mix & Match

Programma Loft Soft

Bright, light shades are used for the wood finish and quartz, while the Loft Soft finish comes in darker tones. The contrast creates an oriental feel.

Ever thought about pairing surfaces in veneered oak with others in laminate, in cement or stone finishes or with others in the UV variant with ultra-matt colours?

Well today you can, thanks to one unique program that gives you the opportunity to mix and match different colours and materials, for a result that will exceed your expectations.
